

Day 5	9:00 AM - 9:30 AM	Recap and Day Overview	Spend the first 30 minutes of the morning recapping the previous days events and preparing students for today's events. There are not any hand outs for this Lab. The timing of each day may need to be adjusted depending on how the students progress through the knowledge transfer process.
	9:30 AM - 10:30 AM	Lab - Take Apart and Put Together (Take I)	This lab will be completed twice in the program. Have the students take the physical computer apart and document, as well as label, each component. Work with them to stay as organized as possible when taking the PC apart, so that it is easy for them to reverse the steps. Make sure they are aware of and use all safety precautions possible. Each student needs to have the opportunity to complete this. Have them in groups so that one person slowly takes the machine apart while one person assists in labeling the components. The same student who took the machine apart should then put it back together. After one student has completed, another should get a turn.
	10:30 AM - 10:45 AM	Break	Morning Break Time
	10:45 AM - 12:15 PM	Lab - Take Apart and Put Together (Take I)	Continue lab.
	12:15 PM - 1:15 PM	Lunch	Lunch Break
	1:15 PM - 2:30 PM	Lab - Take Apart and Put Together (Take I)	Continue lab.
	2:30 PM - 2:45 PM	Break	Afternoon Break Time
	2:45 PM - 3:45 PM	Lab - Take Apart and Put Together (Take I)	Windows 8 installation using oracle virtual box
	3:45 PM - 4:00 PM	Q&A	End the day with a Q & A session for the students and set expectations for the next day.
